PROFESSIONAL SUMMARY

Cloud Monitoring Engineer with hands-on experience across **AWS infrastructure, Linux administration, observability, and incident response** in production and ISP-scale environments. Proven ability to triage alerts, drive root-cause analysis, and reduce mean-time-to-resolution using **CloudWatch, Grafana, Prometheus, Docker, and CI/CD pipelines**. Comfortable owning infrastructure end-to-end from provisioning and hardening Linux servers to automating deployments – with a growing focus on **Infrastructure as Code and site reliability engineering (SRE)** practices.

TECHNICAL SKILLS

Cloud & Observability: AWS (EC2, S3, IAM, CloudWatch, VPC, RDS, Route 53), Grafana, Prometheus
DevOps & Automation: Docker, Docker Compose, GitHub Actions (CI/CD), Git, Terraform (IaC fundamentals)
Linux & Networking: Linux (Ubuntu, AlmaLinux), Bash, TCP/IP, DNS, HTTP/HTTPS, SSH, Apache, Network Diagnostics
Operations: Incident Response, Root Cause Analysis (RCA), SLA/SLO Tracking, Alert Triage, On-Call Support
Programming: Bash, SQL, C, HTML

WORK EXPERIENCE

HAZERCLOUD — **Remote**
Junior Cloud Monitoring Engineer — *Aug 2026 – Present*

- Monitor **AWS infrastructure, servers, and databases** in real time using **CloudWatch**, detecting resource saturation, service degradation, and availability issues across production workloads.
- Triage and investigate infrastructure alerts and production incidents involving **CPU, memory, service, and connectivity failures**, resolving SLA using documented runbooks and troubleshooting procedures.
- Lead **Root Cause Analysis (RCA)** for production incidents, documenting findings and coordinating technical escalations with DevOps and Security teams to prevent recurrence.
- Tune monitoring dashboards and alert thresholds to cut alert noise and improve infrastructure visibility, supporting reliable 24/7 shift handovers.

Kerala Vision Broadband Limited — **Kannur, Kerala**
DevOps Intern — *May 2025*

- Administered **Ubuntu Linux** servers in a high-traffic ISP environment, managing filesystem permissions, processes, services, and system resources via standard Linux utilities.
- Diagnosed and resolved network connectivity issues using `ping`, `traceroute`, and `netstat`, reducing recurring downtime tickets.
- Managed **Docker** containers, images, and application logs to support internal deployments and troubleshoot runtime issues.

PROJECTS

Cloud-Native CI/CD Portfolio | AWS EC2 • Docker • GitHub Actions • Linux

- Deployed a Dockerized web application on **AWS EC2**, configuring IAM roles and Security Groups to enforce least-privilege access and controlled network exposure.
- Built a **GitHub Actions CI/CD pipeline** automating build, test, and deployment on every code push, cutting manual release effort and deployment time.

AWS Linux Web Server & Multi-Tenant Hosting | AWS EC2 • AlmaLinux 9 • Apache • Route 53 • Certbot

- Deployed and hardened an **AlmaLinux 9 EC2 web server** with Apache, PHP-FPM, restrictive Security Groups, and IP-restricted SSH access.
- Implemented **multi-tenant isolation** using dedicated Linux users, filesystem permissions, Apache VirtualHosts, and Route 53 DNS routing for independent sites.
- Configured **Let's Encrypt TLS via Certbot** with automated renewal and HTTP-to-HTTPS redirection, independently troubleshooting DNS, SSL, OOM, and dynamic-IP failures.

AI AR Memory Palace (Final Year Project) | Python • Flask • Unity • Google Drive API

- Developed a **Python/Flask REST API** with an AI summarization pipeline converting educational PDF/PPT documents into digital flashcards.
- Built an Android AR application in **Unity and ARCore** to project interactive flashcards onto physical surfaces, integrating the Google Drive API for content sync.

EDUCATION

St. Thomas College of Engineering and Technology — **Kannur, Kerala**
B.Tech in Computer Science and Engineering | CGPA: 7.96 / 10.0 — *Oct 2022 – May 2026*

CERTIFICATIONS & ACHIEVEMENTS

- **Introduction to Cloud** — Datacom, Forage Virtual Work Simulation (2024)
- **Linux Unhatched** — Cisco (2023)
- **iTech Hackfest 2023** — National-Level Hackathon, Regional Round Qualifier
